## SUMMARY

Persistent and enthusiastic full-stack web developer driven to explore beautiful, responsive, accessible UI, and build solid, efficient and maintainable systems that lend themselves to social good. Currently seeking to dive further into the realm of React Native and behaviour driven development.

## EDUCATION

### Lighthouse Labs, Vancouver — Web Development JUL 2018-SEP 2018

- Intensive, full-stack web development bootcamp
- 500+ hours of mentor-assisted project-based programming
- Building apps using HTML5/CSS3, JavaScript, SQL, React, Rails and more

## PROJECTS

**Briteboard** - An online collaborative whiteboard for creative sketching, diagramming, and project planning with your team (or friends!). Built with **Fabric.js** and **HTML5 Canvas**.

**CrabbyApp** - A real-time, multi-user chat application built with **React**, **WebSockets** and **Express**.

## EXPERIENCE

### Einstein Capital, Vancouver

#### Software Engineer March 2019-Present

- Corrected initialization failures and reinforced error-handling in React Native mobile app
- Added new 'Remember Me' feature to React Native app
- Refactored multiple React Native components for reusable functionality
- Upgraded React Native version from 0.57.1
- Managed dependencies for React Native project and solved multiple build issues across iOS & Android platforms
- Contributed major bugfixes and refactoring of Vue.js-based web client
- Added routing and filters for transaction data to Node.js payment APIs

#### QA Automation Engineer Oct 2018-March 2019

- Wrote and maintained automated API & end-to-end test suites with Postman and Selenium
- Initiated development of front-end unit testing using Mocha and Chai
- Managed weekly releases for multiple services through Github, JIRA and Jenkins
- Aided with manual testing of APIs and web client services

### Omer DeSerres, Vancouver

#### Assistant Manager Mar 2017-Jul 2018

- Managed daily store operations and scheduling in a variable environment
- Trained and supported staff across multiple departments
- Interacted positively and daily with customers, staff, management, head office, and suppliers

#### Merchandiser Jul 2014-Mar 2017

- Created compelling displays through analysis of inventory and sales data
- Led full restructuring of store layout and assisted setup of new location
- Initiated development of consistent merchandising standards and store practices

## SKILLS

### Languages

JavaScript  
HTML5 & CSS3

### Libraries & Frameworks

Node.js  
Vue.js  
Express.js  
React  
jQuery  
AJAX

### Mobile

React Native  
Redux  
Android Studio  
Xcode

### Database

MongoDB  
PostgreSQL &  
Knex.js

### Testing

Postman  
Selenium  
Cucumber/Gherkin  
Mocha/Chai

### Additional

Git CLI  
Jenkins  
JIRA  
TablePlus
