SUMMARY

A junior full-stack web developer with a great appreciation for collaborative problem solving. Excited by beautiful & functional interfaces, efficient & sustainable systems and forever seeking to expand my horizons. My 5 year history in the retail industry encouraged me to develop my sense of dedication, persistence and enthusiasm, as well as strong interpersonal and organizational skills.

PROJECTS

Bendito - A responsive, team-built food-ordering and order management application that communicates with clients via SMS. Built with JavaScript, PostgreSQL, Express, Twilio API, Ajax, jQuery and HTML/CSS/SASS with Bootstrap.

Relephant - A single-page Twitter-clone application allowing users to anonymously create posts. Created using JavaScript, Express, Node.js, MongoDB, jQuery, Ajax and HTML/CSS and hosted on Heroku.

TinyApp - A multi-page app allowing users to create and share shortened URLs. Coded following RESTful practices, using Node.js and Express for server-side implementation and HTML, EJS templating and custom CSS for front-end views.
